AND CONTROL
FOR ALL TYPE
OF BUILDINGS

DMX³ frame 1600

DMX³ frame 2500

DMX³ frame 4000

Electrical panel equipped with DIN rail and plate mounting MCBs and DPX³ MCCBs up to 1 600 A

Main electrical panel equipped with DPX³ MCCBs and DMX³ ACBs up to 6 300 A

Thanks to DPX³ range of MCCBs and to DX³ MCBs you can benefit of the advantages of a complete protection system at any level of the installation

DMX³ frame 6300

Draw-out DMX³ frame 2500

Optimized performance up to 6300 A

DMX³ air circuit breakers and DMX³-I isolating switches are available in four frame sizes. Four breaking capacities for circuit breakers: 42 kA, 50 kA, 65 kA and 100 kA.

The range covers 11 rated currents, between 630 A and 6300 A. All range of DMX³ air circuit breakers and DMX³-I isolating switches is available in fixed and draw-out version.

- DMX³ 42 kA
- DMX³ 50 kA
- DMX³ 65 kA
- DMX³ 100 kA
- DMX³-I

(1) Available only on DMX³ 2500, 4000 and 6300

BREAKING CAPACITIES AND RATED CURRENTS

| | 630 A | 800 A | 1000 A | 1250 A | 1600 A | 2000 A | 2500 A | 3200 A | 4000 A | 5000 A | 6300 A |

| | 4P | 465 mm | 433 mm | 555 mm | 137 kg |
| FRAME 6300 100 kA | 3P | 465 mm | 433 mm | 804 mm | 216kg |
| | 4P | 465 mm | 433 mm | 1064 mm | 274 kg |

(2) For trip-free switches, please consult us

(3) Including base

LEGRAND ADVANTAGE

The overall dimensions of the breaker contribute considerably to an efficient use of the space inside the electrical panel. The constant depth for all the rated currents, for the frames 2500, 4000 and 6300 facilitates configuration of the enclosures and connection of the busbars.

OTHER ELECTRICAL FEATURES

Rated operational voltage U_e : 690 Vac 50/60 Hz
 Rated insulation voltage U_i : 1000 Vac 50/60 Hz
 Rated impulse withstand voltage U_{imp} : 12 kV
 Category of use: B
 Ambient temperature: - 25 °C to 70 °C
 Humidity: + 55 °C with relative humidity of 95%, conforms to IEC 68-2-30

Precise & user friendly LCD tripping units

Besides their easy mounting and connection, strength and good continuity of operation, 3 types of electronic units allow precise adjustment of different limits for current values and time delay.

The result is an efficient protection against electrical faults while maintaining total discrimination with downstream breakers.

The LCD display lets you monitor the measured current values and informs you on fault adjustment and log (the cause of last trip and maintenance operations).

MP4 LI ELECTRONIC PROTECTION UNIT CAT. NOS. 0 281 64 AND 0 288 00

0 281 64

0 281 66

0 288 02

The following settings are adjusted using rotary selector switches:

- Long time delay protection against overloads: I_r
- Long delay protection operation time: t_r
- Short time delay protection against short circuits: I_{sd}
- Short time delay protection operation time: t_{sd}
- Instantaneous protection against very high short circuits: I_i
- Earth fault current: I_g
- Time delay on earth fault tripping: t_g
- Neutral protection: I_N

LEGRAND ADVANTAGE

All protection units of DMX³ 2500 to 6300 are equipped with batteries so you can monitor the parameters even when the breaker is not connected and all data remains stored in memory.

MORE INFORMATION

All DMX³ breakers are factory equipped with any MP4 protection unit LI, LSI or LSIg according to your requirements. You just need to select and indicate the 2 catalogue numbers when placing the order (1 for the breaker and 1 for the tripping unit).

MP6 LSI touch screen protection unit

Colour touch screen

LEDs indicating correct operation, pre-alarm and alarm for overload and temperature

Settings lock

Mini USB port for PC connection

ON button

Innovative & user friendly touch screen tripping units

MP6 electronic protection units are equipped with a colour touch screen, particularly user friendly, thanks to intuitive icon-based navigation system. The colour display provides a clear presentation of the parameters of the installation.

Touch screen protection units integrate all the functions of LCD tripping units and have an advanced measurement function which, in addition to monitoring currents, can also be used to display voltages, active and reactive powers, frequency, power factor, and also energy.

Alarms can be programmed on a number of these parameters: max. voltage, min. voltage, voltage imbalance, max. and min. frequency, etc.

MP6 LSI TOUCH SCREEN PROTECTION UNIT CAT.NO. 0 288 03

The following settings are adjusted using the touch screen:

- Neutral protection: **I_N**

Earth fault tripping curve preview

+++++ +++++

LEGRAND ADVANTAGE

The icon-based interface of the management software and the innovative touch screen technology used for MP6 tripping units simplify setting and preparing operations of the DMX³ circuit breaker.

MORE INFORMATION

The MP4 and MP6 electronic protection units of the DMX³ ACBs equipped with communication option Cat.No 0 288 05 or 0 281 70 can communicate via an RS-485 port. This port is used for supervising

(remote monitoring and management) the devices in the installation, using the MODBUS protocol. It is therefore possible to control circuit breaker opening and closing, display the electrical parameters and detect all the alarms generated by each device, from a PC.

Power Control Station is a software application for PCs allowing to exchange data with the protection unit of the DMX³ through the mini USB port. This software allows to monitor the status of the breaker, display information (firmware and device versions, alarms, measurements, parameters, fault history, settings), update the firmware of the protection unit, generate reports based on the data stored and read by the protection unit, run diagnostic tests.

STARTING MENU

This menu displays the values of I_1 , I_2 , I_3 and I_N as a diagram, the date and the hour, and the alarm icon. If the breaker opens following an electrical fault a specific icon will appear on the upper part of the screen. Pressing this icon will open a new window showing the cause of the last event.

Other possible actions:

- Right arrow icon: access the main menu
- Alarm icon: preview the cause of the alarm in course

MAIN MENU

The main menu allows accessing different windows for setting different parameters of the breaker or previewing measured values, battery status, tripping history, etc.

The following accesses are possible:

- 1 Setting according to the tripping curves (current and time)
- 2 Access tripping unit settings (luminosity, contrast and sound volume)
- 3 Access to general information of the breaker
- 4 Back to the previous page
- 5 Access measured values menu
- 6 Access archives
- 7 Preview battery charging status

Innovative & user friendly touch screen tripping units

CONTINUED

MP6 electronic protection units collect all the useful information in 5 sections, each one easily reachable via the main menu in order to allow an efficient control.

MP6 electronic protection units have an intuitive graphical interface. All useful information and selected settings are easy to understand and visible at a glance.

For example current values can be visualized on the starting page thanks to a histogram. Different other settings can be simultaneously displayed on the "settings" screen in order to have a global view.

PROTECTIONS SETTING MENU

Vertical arrows allow scrolling between different electrical parameters:

li, lsd, tsd, lr, tr, lg, tg, etc. Pressing horizontal icons gives access to corresponding windows allowing value settings. Each value can be increased/decreased, validated or suppressed. The values need to be saved into memory at the end of the process, for each setting.

MEASURED VALUES MENU

This window allows previewing of measured values for:

- Currents
- Voltages (Ph/N and Ph/Ph)
- Active and reactive powers
- Power factor (total and per phase)
- Active and reactive energy
- Harmonics (for currents and voltages)

Pressing **I**, **m**, **M** and **avg** icons at the bottom of the window will display respectively: instantaneous, minimum, maximum and average value of electrical parameters.

+++++ +++++
 +++++ +++++

MORE INFORMATION

• The following events and values are registered into memory and can be accessed via specific menu: cause of the last event, event counter, events history with date and hour, alarms history with date and hour

- MP6 tripping units allow following application: logical selectivity, management of non priority loads, contact management (with Cat.No 0 288 12)
- MP6 tripping units allow following alarms: power reverse, current imbalance, maximum and minimum voltage values U1N, U2N, U3N, maximum currents I1, I2, I3, voltage imbalance (phase-neutral), inversed phase rotation, maximum and minimum frequency values.

Draw-out DMX³ frame 2500

Shunt trip

Undervoltage release

Closing coil

Motor operators

Fast clipping control accessories

You can remotely control the DMX³ thanks to its range of accessories: shunt trips, undervoltage releases, motor operators and closing coils.

All the control accessories are simply clipped on to the front panel of the circuit breaker, which is especially configured in order to facilitate the clipping.

Every type of accessory is compatible with its own location, in order to avoid any possible mistake.

MOTOR OPERATORS

Motor operators, are used for remotely reloading the springs of the circuit breaker mechanism immediately after the device closes. The device can thus be re-closed almost immediately after an opening operation.

To motorise a DMX³ it is necessary to add a release coil (undervoltage release or shunt trip) and a closing coil.

If the supply voltage of the controls fails, it is still possible to reload the springs manually. Motor-driven controls have "limit switch" contacts which cut off the power supply of their motor after the springs have been reloaded. Motor operators are easy to mount, with only three screws.

Motor operator for DMX³ 1600, DMX³ 2500 to 6300

| Size | FOR DMX ³ | | |
|--|-------------------------|-------------------|---------|
| | 1600 | 2500 to 6300 | |
| | | 42, 50, 65 kA | 100 kA |
| Rated operating voltage V _n | 24 V ~ / = | 24 V ~ / = | |
| | 48 V ~ / = | 48 V ~ / = | |
| | 110 - 130 V ~ / = | 110 - 130 V ~ / = | |
| | 220 - 250 V ~ / = | 220 - 250 V ~ / = | |
| | 415 - 440 V ~ | 415 - 440 V ~ | |
| | | 480 V ~ | |
| Voltage range (% V _n) | 85 to 110 | | |
| Max. power consumption (W/VA) | 240/240 | 180/180 | 240/240 |
| Max. peak current for about 80 ms | 2 to 3 x I _n | | |
| Charging time (s) | 5 | 5 | 7 |
| Operating frequency (n°/min) | 2 | 2 | 1 |

SAFETY AND PADLOCKING ACCESSORIES FOR AN INCREASED SECURITY

The DMX³ circuit breakers draw-out types are delivered as standard with safety padlocking shutters preventing access to live terminals. They have a number of other safety devices, such as:

- Key-operated locks:
 - Main contacts open
 - Circuit breaker in draw-out position
- Padlocks for:
 - Main contacts open
 - Contact shutters closed (for draw-out position)
- Door locking in order to prevent the opening of the electrical switchboard door when the contacts of the ACB are closed.

Fixed version equipped with padlocking system

Draw-out version equipped with key-operated locks

Easy identification of control accessories

Electrical auxiliaries are connected on the front panel on terminal blocks provided for this purpose. Accessories are identified on the front panel.

As the cover has window, it is easy to ascertain, which devices are fitted on the circuit breaker.

FRONT PANEL CONNECTION TERMINAL BLOCK

The terminal block of DMX³ ACBs offers the possibility to connect a trip contact, up to 10 auxiliary contacts (up to 6 contacts for DMX³ 1600) and different other control and signalling functions

You can easily transform the rear terminals into vertical or horizontal type by using the unique reversible connector.

CONNECTIONS: A FEW RECOMMENDATIONS!

- Connections provide the electrical connection of equipment and are also responsible for a considerable proportion of their heat dissipation.
- Connections must never be under-sized.
- Plates or terminals must be used over a maximum area.

- Heat dissipation is encouraged by arranging the bars vertically. If an uneven number of bars is connected, place the higher number of bars on the upper part of the terminal.
- Avoid bars running side by side: this causes poor heat dissipation and vibrations.
- Place spacers between the bars to maintain a distance between them which is at least equivalent to their thickness.

Automatic transfer switches

Stylish ergonomic design

Backlit screen, very easy to read, adjustable brightness and contrast. Menu available in 5 or 8 languages depending on unit model

Clear marking on the front panel for easy identification of the various functions

Touch-sensitive buttons for programming the various operating parameters directly on the control unit

The optical communication port on the front can take a USB or a Wi-Fi connection module, which allows communication with a computer, smartphone or a tablet for programming, diagnostics and data downloading, without having to cut off the power to the electrical panel.

Continuity of service & increased safety

Automatic transfer switches answer the double need of continuity of service and greater safety (security). Traditionally used in hospitals, public buildings, industries with continuous manufacturing

processes, airports and military applications, automatic transfer switches become increasingly required for new applications such as telecommunications and computing treatment or in the management of

energy sources, notably those say "renewable energies". Our range of control units includes 3 different types, depending on the desired service level.

STANDARD UNIT

CONFIGURABLE UNIT

CONFIGURABLE UNIT

Configurable models are fitted with an optical port designed to take communication modules. These modules can be used to configure the control units via a PC, tablet or smartphone, on which the software or Legrand app has already been installed.

Thanks to its digital displays and different LEDs it is possible to watch permanently the state of the inverter, as well as the presence and the value of the voltage on each power supply.

Mechanical interlock device

Cable for mechanical interlock

Transfer switching & interlocking

Mechanical interlock is set up using cables and a mechanical interlock device and can interlock 2 or 3 devices, which may be different type in a vertical or horizontal configuration.

The interlock device is mounted on the right-hand side of the air circuit breaker.

DMX³ size 1600 and DMX³ size 2500

MOUNTING PRINCIPLE

In XL³ and XL³ S, the DMX³ devices and the associated busbars are arranged according to an identical principle for power ratings up to 4 000 A, that is, the possibility of mounting two devices per enclosure.

The installation height of DMX³ units is always 600 mm whatever the type and size of the device. When 2 DMX³ devices are installed in the same cell, this leaves at least a useful 600 mm for running the busbars.

Settings and curves **p. 47**

DMX³ circuit breakers must be equipped with electronic protection units (to be ordered together for factory assembly) enabling very precise adjustments of the protection conditions, while maintaining total discrimination with downstream devices
All protection units are equipped with batteries for powering in case of mains fault or when the breaker is open or not connected

| Pack | Cat.Nos | MP4 protection units with LCD screen |
|------|-----------------------|---|
| 1 | 0 288 00 | Integrated LCD screen for displaying electrical values, settings and log Adjustment via selector switches LI protection unit Adjustment of: I _l , I _r , t _r |
| 1 | 0 288 01 | LSI protection unit Adjustment of: I _{sd} , t _{sd} , I _r , t _r and I _l |
| 1 | 0 288 02 | LSIg protection unit Adjustment of: I _{sd} , t _{sd} , I _r , t _r , I _l , I _g and t _g |
| 1 | 0 288 03 | MP6 touch screen protection units Measure and display instantaneous, maximum and average values of different electrical values and protection conditions Fault signalling and log LSI protection unit Adjustment of: I _{sd} , t _{sd} , I _r , t _r and I _l |
| 1 | 0 288 04 | LSIg protection unit Adjustment of: I _{sd} , t _{sd} , I _r , t _r , I _l , I _g and t _g |
| 1 | 0 288 05 ¹ | Accessories for electronic protection units Communication option for DMX ³ electronic protection units |
| 1 | 0 288 06 | 24 V DC external auxiliary power supply |
| 1 | 0 288 10 ¹ | External neutral for DMX ³ 6300 |
| 1 | 0 288 11 ¹ | External neutral for DMX ³ 2500 and 4000 |
| 1 | 0 288 12 ¹ | Module programmable output |

¹: Optional accessories, to be ordered when ordering electronic protection unit and DMX³ air circuit breakers for factory assembly

| 1600 | 2 x 50 x 10 | 2 x 50 x 10 | 2 x 50 x 10 | 2 x 50 x 10 |

Note: The tables presenting the minimum recommended dimensions of connection plates and bars per pole should be used solely as a general guideline for selecting products. Due to extensive variety of switchgear constructions shapes and conditions that can affect the behavior of the apparatus, the solution used must always be verified

Frame 6300 - fixed and draw-out versions

| In (A) | Vertical bars (mm) | Horizontal bars (mm) |
|--------|--------------------|----------------------|
| 5000 | 6 x 100 x 10 | 6 x 100 x 10 |
| 6300 | 7 x 100 x 10 | 7 x 100 x 10 |

Note: The tables presenting the minimum recommended dimensions of connection plates and bars per pole should be used solely as a general guideline for selecting products. Due to extensive variety of switchgear constructions shapes and conditions that can affect the behavior of the apparatus, the solution used must always be verified

Frame 4000 - fixed and draw-out versions

| In (A) | Vertical bars (mm) | Horizontal bars (mm) |
